Professional Summary

AI-focused Computer Science student (AI major) with hands-on experience in LLM systems, prompt engineering, and model evaluation. Designed and implemented a secure CLI-based AI developer tool that generates deterministic pytest unit tests using an LLM API with strict validation and injection resistance. Strong foundation in Machine Learning, NLP concepts, and generative AI architectures including RAG, evaluation pipelines, and fine-tuning trade-offs. Interested in building reliable, secure, and production-ready AI systems.

TECHNICAL SKILLS

Programming & Tools

- Python
- CLI application development
- Git & GitHub
- Environment variable management (.env)
- REST API integration

Machine Learning & AI

- Machine Learning fundamentals
- Natural Language Processing (NLP)
- Transformer-based models (conceptual understanding)
- Model evaluation metrics (Accuracy, Precision, Recall, F1, BLEU, ROUGE)

LLM & Generative AI Systems

- Prompt Engineering (system prompts, output constraints, injection resistance)
- Retrieval-Augmented Generation (RAG): embeddings, vector similarity search (conceptual + applied understanding)
- LLM Evaluation (rubric-based scoring, hallucination detection, instruction-following analysis)
- Agentic AI fundamentals (tool-calling workflows, reasoning loops)
- Fine-Tuning concepts (transfer learning, LoRA, domain adaptation vs. RAG trade-offs)
- Secure LLM application design (input sanitization, scope validation, deterministic output enforcement)

Relevant Experience

LLM Evaluation & Alignment Contributor (Freelance / Remote)

Ongoing

- Evaluated LLM outputs for instruction-following, factual accuracy, safety, and bias.
- Performed structured side-by-side comparisons using rubric-based scoring frameworks.
- Designed edge-case prompts to test ambiguity handling and model robustness.
- Identified hallucinations and unsafe outputs in Arabic and English responses.
- Contributed to alignment-focused evaluation workflows for model refinement.

AI Data Annotation & Model Evaluation Specialist

Freelance / Remote — Ongoing

- Actively working on AI data annotation and LLM evaluation projects, contributing to the training and refinement of advanced language models.
- Designed and evaluated prompts to test model behavior across instruction-following, ambiguity handling, safety boundaries, and factual accuracy.

- Performed side-by-side comparisons of AI outputs and scored responses using predefined rubrics.
- Identified hallucinations, bias, incorrect assumptions, and culturally inappropriate outputs in Arabic and English responses.
- Wrote high-quality Golden Responses that correctly follow instructions and resolve ambiguity for target users.
- Applied strict annotation guidelines while maintaining consistency and attention to detail across large datasets.

AI Data Annotation — mercor Bilingual Project (Arabic–English)

Remote | 4-week Project [jan 2026 -feb 2026]

- Contributed to a U.S.-based bilingual AI training project focused on Arabic–English language alignment.
- Evaluated AI-generated responses for linguistic correctness, clarity, and cultural appropriateness across both languages.
- Supported quality control by flagging inconsistencies between source documents and model outputs.
- Ensured proper handling of dialectal Arabic vs. Modern Standard Arabic depending on task requirements.
- Collaborated within structured evaluation workflows to meet tight quality and timeline standards.

Secondary Experience (Technical Internships)

Infinity Tech Company — .NET & Cloud Development Intern (Summer 2024)

- Contributed to full-stack web development using ASP.NET Core MVC, Razor Pages, and Web API.
- Implemented RESTful services and handled API integration between frontend and backend layers.
- Worked with Entity Framework Core for database management and data persistence.
- Participated in cloud deployment and service configuration using Microsoft Azure.
- Followed clean architecture principles and industry-standard documentation practices.

NTI — Internship (Summer 2024)

- Participated in structured task execution and quality checking within team environments.

Education

-Cairo University — Bachelor's in Computer Science (AI Major)

Expected Graduation: 2027

Relevant Focus: Artificial Intelligence, Machine Learning foundations, NLP concepts, data structures, algorithms

- Red Sea STEM High School — High School Diploma (2023)

Certifications

- Machine Learning Specialization – Stanford University & DeepLearning.AI (Coursera), 2025
- Google Data Analytics Professional Certificate – Google (Coursera), 2026
- Hugging Face Agents Course – Hugging Face, 2025
- Data Science & Analytics – HP LIFE, 2026
- Databases Learning Path – Manara, 2026
- IEEE Xtreme 18.0 Programming Competition – IEEE, 2024
- Arabic Grammar & Proofreading (Arabic MOOCs)
- Introduction to Linguistics (Coursera)
- Data Annotation or NLP Basics

Languages

- Arabic — Native proficiency
- French — B2 level
- English — c2/Professional working proficiency
